

— BRAND · WEB · MOTION

A website with *shoulders*. ~~Soft~~ Structured.

A scroll-driven editorial story for the Haldane & Co. tailoring site — scene by scene, seam by seam. Built around cloth, construction, and the quiet arrogance of a well-cut jacket.

Prepared for
HALDANE & CO.

Document
VISUAL DIRECTION · V1

— THE VISION

Savile Row meets the *machine shop*.

This isn't a shop that happens to sell suits. It's a workshop that lets you watch. Cloth, chalk, canvas, thread — the site is built out of the same materials the garment is. Nothing is styled to look expensive. It looks made.

P / 01

Precise, never precious

Confidence without cologne. The brand states measurements, not adjectives. If a claim can't be specified in millimetres, hours, or grams, it doesn't ship.

P / 03

Cloth as the hero image

Fabric fills frames. Weave at 400% magnification. Photography is close, raking-light, tactile — you should almost feel the hand of the wool.

P / 02

Construction is the story

Canvas, seams, lapel roll, buttonhole. The site shows how it's built, because how it's built is the only real differentiator in menswear.

P / 04

Motion with weight

Wool drapes. It doesn't bounce. Every animation carries mass and settles — the way a shoulder falls when the jacket is put down.

COLOR PALETTE

Seven swatches. One *wardrobe*.

Onyx and graphite do the tailoring. Chalk and oyster are the shirting underneath. Brass is the button — one per garment, never a coat of paint. Oxblood is the lining nobody sees until you move.

PRIMARY · 60%		SECONDARY	
Onyx		Graphite	
HEX	#14161A	HEX	#2A2E34
RGB	20, 22, 26	RGB	42, 46, 52
OKLCH	0.20 0.01 265		
		TERTIARY	
		Smoke	
		HEX	#8B9099
		RGB	139, 144, 153
ACCENT · 5%		SURFACE	
Brass		Oyster	
HEX	#B8894B	HEX	#D9D2C5
RGB	184, 137, 75	RGB	217, 210, 197
SURFACE			
Chalk			
HEX	#F2EFE9		
RGB	242, 239, 233		

RULE 01 — DOMINANCE

60% onyx. 25% chalk or oyster. 10% graphite and smoke. 5% brass. Oxblood appears only on reveal — hovers, linings, open states.

RULE 02 — SECTION RHYTHM

Alternate dark rooms (onyx, graphite) with light ones (chalk, oyster). Dark for cloth and craft, light for product, price, and proof.

RULE 03 — WHERE BRASS LIVES

Buttons, rules, active states, italicised words in display headlines, measurement callouts, the cursor readout. Nowhere else.

— TYPOGRAPHY

Three voices. One *fitting*.

DISPLAY

Bodoni Moda

High contrast, sharp serifs, no apologies. The house voice — closer to a magazine masthead than a shop sign.

USE

Headlines

Pull-quotes

Cloth names

Prices

Cut for *one man*. Half-canvas.

↑ REGULAR • ITALIC • BOLD — THREE WEIGHTS, ONE FAMILY

BODY

Archivo

A neutral grotesk with good bones. It stays out of the way and holds a straight line at every size.

USE

Paragraphs

Subheads

UI labels

Buttons

Reads clean at 14px, holds authority at 24. The workhorse of the wardrobe.

Archivo sits beneath Bodoni without competing with it — the shirt to the jacket. It carries the descriptions, the size guides, the fine print, and every button on the site.

Captions, metadata, and legal sit at the small end. Pair with the mono voice for specs and section markers — the rhythm is part of the tailoring.

MONO

JetBrains Mono

The tape measure. Technical, quiet, exact — the voice of numbers and section markers.

USE

Measurements

Cloth codes

Eyebrows

Section numbers

[02 / cloth] — SHOULDER • 46.5 CM

SECTION NUMBER • EYEBROW • SPEC TAG • SWATCH CODE

— TYPE SCALE

The *ladder*.

D1	128 / 0.90	Hero display
D2	92 / 0.92	Section opener
H1	60 / 0.98	Big headline
H2	38 / 1.08	Sub headline
H3	24 / 1.15	Product / card title
B-LG	19 / 1.55	Body large — feature paragraphs
B	16 / 1.55	Body — default paragraph
B-SM	14 / 1.50	Caption — care, fabric, fine print
MONO	12 / 1.70	EYEBROW • SPEC • 0.18EM TRACKING

PAIRING RULES

Display for headlines, cloth names, and prices. Body for anything a customer must read to buy. Mono for anything measured. Bodoni and Archivo never share a line.

HIERARCHY

One display headline per scene. Sub-headlines stay quiet. Body is generous — 60–70 characters a line. Mono annotates; it never argues.

— VISUAL LANGUAGE

Six recurring *elements.*

Chalk marks

Hand-drawn tailor's chalk annotations over photography — arrows, ticks, a circled seam. Rough, white, imperfect. The house thinking out loud on the cloth.

Seam-stitch rule

The site's only divider. A dashed stitch line in brass. Used under headlines, between sections, and as the underline on every link and hover state.

Cloth swatch chips

Slightly rotated fabric squares with a mono code beneath — W-1408 · 140Z. Used for tags, filters, and small flourishes throughout.

Weave texture

A faint herringbone grain sits over every dark surface at 3–5% opacity. Screens should feel like cloth held to the light, never like flat digital paint.

Tape-measure cursor

A thin crosshair follows the cursor. Over product, it grows a small brass readout — a live measurement of whatever it's touching. The site is always measuring you.

Spec tags

Mono labels pinned to imagery with a hairline leader, exploded-diagram style. They name the part, not the feeling — LAPEL · 8.5 CM.

— HOW IT MOVES

Tailored, *not twitchy.*

M / 01

One big moment per scene

Each section earns exactly one choreographed reveal — a jacket that assembles, a bolt of cloth that unrolls, a number that counts. Restraint is the point. One memorable moment lands harder than ten small ones.

M / 02

Wool, not rubber

Nothing bounces. Nothing springs. Every transition eases out slowly and settles with weight — 600–900ms, heavy curves. Cheap brands bounce. Tailors drape.

M / 03

The scroll stays yours

Just enough inertia to feel alive, never enough to feel hijacked. Scroll-locked sections release cleanly. The reader always controls the pace.

M / 04

Headlines arrive word by word

Display lines reveal one word at a time, rising from a clipped baseline with a faint tilt — as if being pressed. The brass word lands last, like the final stitch.

M / 05

Cloth reacts to light

Hovering a fabric shifts a raking highlight across the weave. The sheen moves; the image doesn't. It's the closest a screen gets to touching wool.

M / 06

The garment builds on scroll

In the construction scene, layers stack as the reader descends — canvas, then shell, then lining, then buttons. Scroll up and the jacket comes apart again.

M / 07

Accessible by default

Under reduced-motion, every reveal becomes a clean fade and every scroll-lock releases. The story still lands — it just lands quietly.

— THE SITE, SCENE BY SCENE

Nine scenes. One *scroll*.

The homepage reads as one continuous fitting — from the first measurement to the final appointment. Sequenced for emotional pacing, not for navigation. The shop and product pages inherit the same system, at a quieter volume.

01 The Measure

05 The Anatomy

06 The Fitting

07 The Wearers

08 The Workroom

09 The Appointment

Opening sequence

01

COLD OPEN

The Measure

The first four seconds. Sets the rules.

VISUAL

Full-bleed onyx. A single figure in a half-finished jacket, shot from the shoulder down in raking light. Chalk marks and pins still in the cloth. The wordmark sits small, top-left.

MOTION

A tape-measure line draws itself across the shoulder, stops, and prints a brass reading: *46.5 cm*. The headline types in beneath it. The cursor becomes a crosshair.

COPY

"We start with a number." No CTA above the fold. The home page doesn't sell — it sizes you up.

02

MATERIAL

The Cloth

Wool, at 400%.

VISUAL

The page turns to chalk. A bolt of cloth runs edge to edge, macro — you can count the threads. Three swatch chips sit at the lower right with mono codes and weights.

MOTION

Section locks to scroll. The bolt unrolls horizontally as the reader moves down; the weave sharpens from blur to thread. Hover any swatch and light rakes across it.

COPY

"Woven in Huddersfield. Cut in Bangalore." Mill name, mill year, GSM, and a single line on why this cloth and not another.

03

MANIFESTO

The House Cut

What we believe, kinetically.

VISUAL

Back to onyx. A full-viewport statement: "A suit should look like it was bought *earned*." A halftone shoulder silhouette drifts behind the type.

MOTION

The headline reveals word by word. Once "bought" settles, a chalk stroke draws through it; a beat later "earned" arrives in brass italic. Background shifts graphite → onyx across the scroll.

COPY

Sub: "Structured shoulder. Suppressed waist. Nothing fused, nothing rushed. That's the house cut — everything else is your call."

Product & craft

04

COLLECTION

The Line

The rail, horizontally.

VISUAL

Chalk surface. Suits hang on a rail across the viewport — full-length, evenly spaced, shot on hanger not on model. Price in Bodoni, cloth code in mono beneath each.

MOTION

Vertical scroll drives the rail sideways, like pushing hangers along a bar. Hover lifts a suit slightly off the rail, dims its neighbours, and slides in a small spec card.

COPY

"Six cuts. No seasons." Each card: cut name · cloth · weight · price. Nothing else. CTA: "See the full rail →"

05

CONSTRUCTION

The Anatomy

The jacket, exploded.

VISUAL

Onyx. A single jacket floats centre-frame with its layers separated in depth — canvas, shell, lining, buttons. Spec tags with hairline leaders point to each part.

MOTION

The hero moment. As the reader scrolls, the layers stack together into a finished jacket; scroll up and it comes apart again. Tags fade in one by one, brass, in sequence.

COPY

"Half-canvas. 46 hours. Two fittings." Each layer carries one line — what it is, and what it does when you move.

06

SERVICE

The Fitting

Made-to-measure, in three steps.

VISUAL

Oyster surface. Three numbered panels: Measure · Choose · Fit. Each with a close-crop workroom photo, chalk-annotated. A stitch rule runs the length of the section as a progress line.

MOTION

The stitch line draws itself as the reader scrolls; each panel snaps in as the thread reaches it. Timeline durations count up in mono — *Week 1* → *Week 6*.

COPY

"Six weeks from tape to tailor's mirror." Price band stated plainly. CTA: "Book a fitting →"

Proof, house, close

07

P R O O F

The Wearers

Portraits, not testimonials.

V I S U A L

A grid of black-and-white portraits — real clients, shot in their own rooms. On hover, colour returns to the jacket only, and a mono line names the cut and the occasion.

M O T I O N

Portraits shift slightly with mouse position, building depth. Colour bleeds into the garment from the shoulder down, over 700ms. Quiet, no captions until asked.

C O P Y

Header: "Worn in." Section footer: "& 300 more we'll never photograph."

08

H O U S E

The Workroom

The people, the room, the hours.

V I S U A L

Onyx. A wide shot of the cutting table, taped like a polaroid at a slight angle. A torn-paper panel beside it carries the founder's note. Thread spools and shears sit as cutouts in the margins.

M O T I O N

The photo drops into place as if hand-laid. The note fades in line by line. A single thread animates loose from a spool and curls toward the edge of the frame.

C O P Y

"Four cutters. One room. No outsourcing." Founder line, signed. CTA: "Come see it →"

09

C L O S E

The Appointment

The exit. Make it a door.

V I S U A L

Final viewport. A massive "COME IN FOR A FITTING" fills the screen — half solid chalk, half outline. An inline booking form rises from the bottom: name, city, date, what it's for.

M O T I O N

The headline splits along a seam and re-stitches as it enters view. Form fields rise one after another. On submit, a brass thread draws a signature line under the confirmation.

C O P Y

Form: Name · City · Occasion · "What are you wearing it to?" Footer: address, hours, phone, IG. No newsletter popup. Ever.

— SIX COMMITMENTS

What this site *will* be.

01 A palette with conviction

Onyx, chalk, and graphite do the heavy lifting. Brass is the only warmth in the system — used as punctuation, never as background. No gradients. No glass. No luxury-brand gold foil.

02 Type with a point of view

Bodoni and Archivo on every page. A high-contrast serif and an honest grotesk — chosen, not defaulted to. The site never falls back to a generic UI sans.

03 Cloth, hands, and rooms — never stock

Macro fabric, raking light, real clients, the actual cutting table. No smiling models in a white cyclorama. No AI-slick studio renders. If it wasn't shot in the workroom, it doesn't go up.

04 Layouts with a seam

Asymmetric compositions, flush-left headlines, generous margins. Full-bleed cloth against tight text columns. Composed like a spread, not assembled like a template.

05 Motion that respects the reader

Every animation is tied to a scroll, a hover, or a click. Nothing autoplays. Nothing floats. Reduced-motion is a first-class state, not an afterthought.

06 Copy that states, never sells

Specific, first-person, unhurried. "*Half-canvas. 46 hours.*" — never "*crafted with passion for the modern gentleman.*" The site sounds like a cutter, not like a brand deck.

— READY WHEN YOU ARE

Now let's
cut the
cloth.
